

Changes for The Noise Music System Release v0.9.1.0

View Options ▾ **Fix versions: 0.9.0.0 sort by: Type desc,{issue id}**
asc State: Fixed

Noise-200 — Add visual affordance to the grid splitters.

Noise-8 — Support multiple library locations

Noise-9 — Indicate background process status

Noise-39 — Add new installation wizard

Noise-46 — Add the Eloquera database installation to the installer

Noise-60 — Add upgrade process to installation

Noise-79 — Add play strategy to mix in new releases (new additions to the library)

Noise-80 — Add a splash screen.

Noise-87 — Add the ability to play an empty queue using only the exhausted strategy to select tracks

Noise-97 — Add upgrading of user configuration files during installation.

Noise-108 — Playlist support for featured artists.

Noise-130 — Allow libraries to be selected and switched between.

Noise-189 — Add the ability to set track rating and favorite from queue list.

Noise-202 — Add an ability to replay the queue from a selected track that was previously played.

Noise-204 — Change database identities to short GUIDs to save space.

Noise-206 — Added a view for exploring the library based on published year of albums

Noise-207 — Add audio scrobbling capability

Noise-209 — Added a button to the timeline display of albums to play from the year selected.

Noise-210 — Add a button to the artist display to play tracks from the current artist.

Noise-212 — Add the Bonjour installer to the installation process.

Noise-213 — Add the ability to calculate ReplayGain values.

Noise-89 — Optimize startup time

Noise-186 — Persist the explorer sort orders.

Noise-187 — Revise the explorer view filtering to use the CollectionViewSource.

Noise-191 — Album titles may be wider than the album view, pushing the album information and buttons off the right side.

Noise-193 — Queuing music with an exhaustion strategy in place can result in endless queuing if the physical storage is off line.

Noise-205 — Separate the music library information from the metadata in the database.

Noise-211 — Limit What's New to creation time of database.
