

# Changes for the Noise Desktop v0.4.0.0 Release

Query: **fix for: 0.4.0.0 state: Fixed** ([show in YouTrack](#))

## Bug

---

- [Noise-63](#) — Avoid replaying queued tracks in play queue exhausted strategies.
- [Noise-100](#) — Multi volume albums (in multiple folders) do not play in the correct order.
- [Noise-101](#) — Add the list of band members to the artist view.

## Feature

---

- [Noise-43](#) — Add view for recent library additions
- [Noise-51](#) — Allow peek of next track to be played from the small player.
- [Noise-52](#) — Allow the user to update the database now.
- [Noise-82](#) — Add a play queue exhausted strategy to play from a particular genre
- [Noise-85](#) — Allow individual tracks to be removed from the play queue.
- [Noise-94](#) — Display history last played times as a relative amount
- [Noise-99](#) — List total play time for playlists / albums
- [Noise-104](#) — Add track play counts - sync with file tags.
- [Noise-111](#) — Add button on small player interface to switch to application interface.
