

Release v0.9.6.0

Fix versions: 0.9.6.0 sort by: {Issue id} asc State: Fixed

Noise-12 — Support Tags or Keywords

Noise-83 — Add a play queue exhausted strategy to play from a set of tags

Noise-218 — If a track is duplicated in the queue, delete will remove the first instance.

Noise-242 — Utilize sort prefixes in the album list view

Noise-243 — Provide indication in the various library explorer views that a artist/album/track is being played

Noise-244 — Support AAC/M4A audio files

Noise-245 — Allow a strategy queued track to be promoted to a user selection

Noise-246 — Add a database instance option to leave metadata in place on the original volume.

Noise-247 — Redesign the exhausted playback strategy to support options consistently

Noise-248 — Add support for prefixed names in the Favorites view

Noise-249 — Add the ability to export user tags

Noise-250 — Add track indicators to play the previous/next track when selecting tracks for exhausted playback

Noise-251 — Add a flag to exclude a track from suggested playback

Noise-252 — Add user tags to sidecar content

Noise-253 — Add adjacent track flags to sidecar content
