Fix versions: 0.9.7.0 State: Fixed order by: {issue id} asc

### Bug

---

**Noise-214** — When switching libraries queue strategy parameters may be invalid

### Feature

---

**Noise-254** — Indicate the currently playing track in the various lists. (Artist/Album/Tracks)

**Noise-256** — Eliminate the discrete 'Search' button in the search view, fulfill the search as it's typed.

**Noise-257** — Expand the album editor to manipulate album/track titles and volume assignments.

**Noise-258** — Add the ability to clear all track ratings for an album.

**Noise-259** — Allow the artist list to be filtered by a genre, by clicking on a genre

**Noise-261** — Redesign the queue list to eliminate the expanding nodes

**Noise-262** — Create a panel driven from the currently playing track to display suggested tracks

**Noise-263** — Allow the artist list to be filtered to the list of similar artists of a selected artist

**Noise-264** — Allow track start/end play positions to be set

**Noise-265** — Create a view displaying all rated tracks by an artist.

**Noise-266** — Animate the act of queuing a track or album for play.

**Noise-267** — Allow positioning of the playback time on the left or right ends of the playback slider

**Noise-268** — Integrate library backup into the app.

**Noise-271** — Add the ability to focus the playback related view on any track, not just the playing track

**Noise-272** — Create a shortcut to the application data directory.

**Noise-273** — Create an integration API to other applications

**Noise-274** — Allow switching to/launching other known companion applications

### Performance Problem

---

**Noise-255** — Improve performance and usability in the artist tracks view

### Usability Problem

---

**Noise-260** — Allow only one instance of the application to be running, due to local database contention issues.
