Release v0.9.4

`Fix versions: 0.9.4.0`

Bug

Noise-223 — Allow the sort order of grids (such as the track listing) to be cleared

Noise-225 — Discogs requires login to retrieve discography

Noise-228 — New Tracks list should not indicate current selection if it changes.

Feature

Noise-36 — Database backup

Noise-37 — Database Export

Noise-216 — Queue a random selection from a search result

Noise-219 — Create a headless version to support tablet clients

Noise-220 — Add firewall exception to the installer.

Noise-221 — Add a list of top tracks for an artist

Noise-222 — Add a queue strategy to play top tracks from artists

Noise-224 — Provide the ability to queue for play volumes within an album - such as 'Disc 1'.

Noise-226 — Display census in current database, perhaps as tool tip on library selector.

Noise-229 — Ability to store playback metadata (such as playback speed) with track

Noise-230 — Add a preference to remove previously played tracks from the play queue beyond a specified horizon value.

Noise-231 — Allow playback values such as speed, pan, reverb, etc. to be saved and used on a per track/album basis.

Noise-232 — Add a playback control to stop playing at the end of the current track.
